SNS - Straubing Nordhafen Shuttle

Sustainable rail solution with many possibilities!

OPTIMAL CONNECTION

The Straubing area is ideally placed for logistics, thanks to the new bimodal Contargo terminal and its direct access to the A3 motorway and the highway B20. The central position in East Bavaria and the modern industrial complex of Straubing Sand thus provide ideal conditions for efficient goods flows.

SNS (Straubing Nordhafen Shuttle) offers the attractive possibility of container transports by rail from the Straubing Terminal to the northern German ports via the Terminal in Hof.

FREQUENCY

3 round trips per week (Tue, Thu, Sat.)

NEW: TERMINAL STRAUBING SAND

From January 2026 the newly-constructed terminal in Straubing Sand offers many advantages for your container transports.

Storage capacity: 1,000 TEU

Total area: 50,000 m²

Transport modes: Rail and truck

Depot: Storage options for containers (intermediate buffer) on request

Sustainability: Use of electric trucks for local container transport possible
